PRESIDENT'S MESSAGE

Happy New Year!

Dear Members:

As we close out another challenging year in 2021 and look ahead with optimism and hope towards 2022, we look forward to our members renewing their memberships in 2022. Despite challenging conditions the AHRMNY chapter continued to execute on its purpose to enhance the quality of the delivery of health services and the professional practice of health care and health care related risk management through the following:

- Providing virtual and in person educational activities (when possible and safe) to strengthen the development of healthcare and healthcare related risk management programs and promote professional development of related staff.
- Provide a medium for the interchange of ideas and methodologies among members and other health professionals.
- Assist in the development of professional relationships among Association members and other healthcare professionals in order to facilitate the free exchange of information and solution of mutual problems.
- Provide a forum on healthcare risk management issues and explain the impact of these issues to other appropriate parties including hospital associations, medical societies and civic groups.
- Act as a central source of information in New York State on the new developments and trends in healthcare risk management.

Best wishes to all for a safe and healthy New Year.

Rob Marshall
